

SEARCH REQUEST FORM

3-915

Examiner # (Mandatory): 76048

Requester's Full Name: JANA HINES

Art Unit 1641

Location (Bldg/Room#):

7E17

Phone (circle 305 306 308) 0487

Serial Number: 09/210,995

Results Format Preferred (circle): PAPER DISK E-MAIL

Title of Invention Multi-Component Vaccine Comprising At least 2 ANTIGENS

Inventors (please provide full names): SHEENA LOOMIS, JIAN-PING JANG

PELE CHONG, MICHEL H. KLEIN

Earliest Priority Date: 12/15/98 (12/15/97)

Keywords (include any known synonyms registry numbers, explanation of initialisms):

HIN47 protein.
Haemophilus influenzae
heat shock protein
Adhesin

Search Topic:

Please write detailed statement of the search topic, and the concept of the invention. Describe as specifically as possible the subject matter to be searched. Define any terms that may have a special meaning. Give examples of relevant citations, authors, etc., if known. You may include a copy of the abstract and the broadest or most relevant claim(s).

Please search the claims and
inventors. Thanks.

DETDESC:

DETD(18)

It is reasonable to expect that the pilin, **chaperone**, anchor, minor tip and large minor tip **adhesin** proteins of an H. influenzae pilus must interact with each other during the pilus assembly process. Accordingly, it is believed. . . . produce can be purified and standardized individually, before mixing in the desired proportions with other pilus types to form a **multivalent vaccine**.
